

Prayas Kori

AI Engineer — Machine Learning Specialist

+91 7223980774 | prayask007@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

AI Engineer with strong foundations in machine learning, deep learning, statistics, and cloud computing. Experienced in developing scalable ML models, implementing embedding-based retrieval systems, and deploying applications on AWS. Skilled in building secure, production-ready full-stack systems with authentication and database optimization.

Technical Skills

Programming: Python, TypeScript, JavaScript, SQL, Bash

Machine Learning: Supervised & Unsupervised Learning, Feature Engineering, Model Evaluation, Recommendation Systems

Deep Learning: Neural Networks, CNNs, Transfer Learning

Libraries: NumPy, Pandas, Scikit-learn, TensorFlow, Keras, PyTorch, Streamlit

GenAI: LLM Integration, Embeddings, Semantic Search, Vector Databases

Frontend: React, Next.js, Tailwind CSS

Backend: Node.js, REST APIs, Supabase, OAuth2, JWT Authentication

Databases: PostgreSQL, MySQL, MongoDB

Cloud & Tools: AWS (EC2, S3, IAM), Docker, Git, Jupyter

Security: Identity and Access Management (IDAM), Vulnerability Assessment

Core: Statistics, Data Structures & Algorithms, OOP, System Design

Tools & Testing: Git, Jupyter, Software Testing, TestCase Design, Manual Testing, API Testing, Functional Testing, Bug Tracking

Projects

AI-Powered Smart Bookmark Manager

Next.js, TypeScript, Supabase

- Designed and developed a production-ready web application with Google OAuth and secure JWT-based authentication.
- Implemented Row-Level Security (RLS) to enforce strict per-user data isolation.
- Engineered real-time cross-tab synchronization using Supabase Realtime.
- Optimized database queries for performance and scalability.

Personalized Movie Recommendation System

Python, NLP, Streamlit

- Built a hybrid recommendation engine combining collaborative and content-based filtering.
- Integrated embedding-based semantic search inspired by Retrieval-Augmented Generation (RAG).
- Evaluated model performance using precision, recall, and F1-score metrics.
- Deployed an interactive Streamlit application for real-time recommendations.

Heart Disease Detection - Machine Learning

Python, Scikit-learn

- Developed a K-Nearest Neighbors (KNN) classification model using 13 clinical features.
- Built a user interface for real-time prediction and inference.
- Improved prediction accuracy to 91% through feature tuning and model optimization.

Experience

Security Analyst Engineer Intern

Munitions India Limited, Jabalpur

May 2022 – June 2022

- Contributed to Identity and Access Management (IDAM) system operations and security monitoring.
- Conducted vulnerability assessments and supported compliance enforcement.
- Strengthened system integrity by identifying and removing unauthorized files.

Engineer Intern

Gun Carriage Factory, Jabalpur

May 2023 – June 2023

- Gained hands-on exposure to enterprise IT infrastructure and secure system configurations.
- Assisted in understanding access control mechanisms and operational security practices.

Education

Bachelor of Technology in Mechatronics

Jabalpur Engineering College

2021 – 2025

Senior Secondary (CBSE) — Class XII

St. Gabriel's Senior Secondary School

2021

Secondary (CBSE) — Class X

St. Gabriel's Senior Secondary School

2019
